

Action Learning

Effectively work as a team to find the ideal solution

Module Duration: 10mins

By the end of the module individuals will possess a sound knowledge of the concept with an appreciation of its importance and its suitability to the healthcare sector. You will be in a position to introduce the concept to fellow colleagues, sharing insight on its relevancy to practice development. The module will equip you with tools and techniques to incorporate action learning within your practice to make sustainable change.

A blended approach is utilised with each module containing relevant theory alongside interactive activities and opportunities for reflection.

An end of module assessment will evaluate your understanding of the content covered and individuals will receive a certificate of successful study, whilst a learning review document will allow individuals to recap the key elements covered at another time.

Everything we do is to improve the working life and empower practice staff to help enhance the patient experience.

Action Learning Module Structure
