

Managing Risk

Adopt a systematic approach to risk management to ensure long-term sustainability

Module Duration: 30mins

Everything we do is to improve the working life and empower practice staff to help enhance the patient experience.

Risk Management Module Structure

- ▲ An introduction to risk
- ▲ Identifying risk
- ▲ Assessing risk
- ▲ Addressing risk
- ▲ Module Review Assessment
- ▲ Certificate of Completion (70% pass grade)
- ▲ Module Learning Review Document

Benefits of Risk Management

- ▲ More informed decision making
- ▲ Minimise the effect of threats to practice activities
- ▲ Safe-guard practice objectives

This module provides a succinct introduction to risk and an overview of the risk management process. This will encompass identifying, assessing and addressing risk. By the end of the module you will be in a position to discuss the fundamentals with colleagues, encouraging a more systematic approach to the management of risk.

In the ever-changing health sector environment this insight is of particular importance. Practices have a tendency to conduct business in a risk adverse manner with a low risk appetite. With appropriate training staff will feel more confident in decision making regarding risk, adopting a measured approach that still permits for innovation and business development.

A blended approach is utilised with each module containing relevant theory alongside interactive activities and opportunities for reflection. An end of module assessment will evaluate your understanding of the content covered. Individuals will receive a certificate of successful study, whilst a learning review document will allow individuals to recap the key elements covered at another time.
